Seam Clamps – small components, maximum safety

Our high-quality seam clamps provide safe and reliable mounting solutions for a wide range of standing seam roofs – without damaging the profiles. Thanks to their force-fit and form-fit connection, they offer an outstanding load-bearing capacity, making them ideal for applications such as solar systems, fall protection systems, walkways and guard rails.

A key advantage: Our entire product range is certified according to the European Technical Assessment **ETA-25/0540**, while our DS- and R-Clamps additionally hold the national building authority approval **Z-14.4-912**. This ensures compliance with the highest standards of safety, quality and verified structural performance.

Pre-assembled screws enable quick and easy installation. A wide variety of clamp types allows flexible use on virtually all common seam profiles – ensuring efficient installation processes on every rooftop.

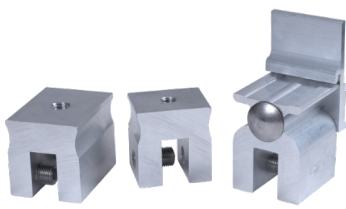

Our Seam-Clamps

DS-Clamps

Double Folded Standing Seam
Clamping with a rounded set screw

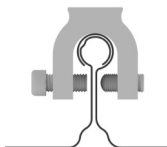

M-Clamps

Angled Standing Seam | Snap-Lock
Clamping with a rounded set screw

R-Clamps

Round "Bulb" Seam
Such as Bemo, Kalzip, Eurorip

Our Profile-Clamps

K15-Clamps

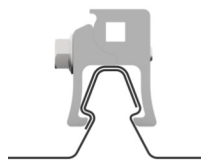

Profiles

Domitec, Lysaght Klip-Lok 406,
Safintra Saflok 410 + 700

K20-Clamps

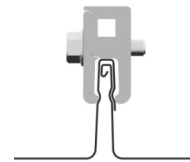

Profiles

Fielders KingKlip, Lysaght Klip-Lok 700,
Optima 980, WeatherClip 655 + 700

RD80-Clamps

Profiles

Domico GBS,
RIB-ROOF 465 o.ä.

Your benefits with us

- > Certified load-bearing capacity via ETA certificate
- > Customized solutions
- > Flexibility due to in-house production
- > In-house expertise
- > Quick delivery
- > Technical consultation
- > Portfolio covering all standard fold types
- > User-friendly installation
