

General Information

CF:x clamps can be used to securely attach PV systems, fall protection devices and much more to handcrafted sheet metal roofs and almost all industrial standing seam systems without penetrating the roof. The range also includes standing seam clamps with clamping jaws that ensure secure attachment to various structures on different international profiles.

Our clamps have European Technical for many profiles and achieve high holding forces.

The benefits of CF:x Clamps

- Non-penetrating fastening on almost all types of folds and profiles
- High holding forces
- General building approval Z-14.4-912
- European Technical Approval ETA-25/0540
- Easy to assemble

Clamps of Metal Roofs

Data sheet

Typ of Clamp

DS-Clamp

50 mm 2 grub screws

DS-Mini

30 mm 1 grub screw

Profile

Double folded standing seam

From lock achieved by grub screw with rounded nose

Building authority approval

Z-14.4-912 ETA-25/0540

M-Clamp

50 mm 2 grub screws

Single folded seams

M-Mini

30 mm 1 grub screw

Snap lock profiles

From lock achieved by grub screw with rounded nose

ETA-25/0540

R-Clamp

50 mm 2 grub screws

R-Mini

30 mm 1 grub screw

Round seam profiles

like Bemo, Kalzip

Building authority approval Z-14.4-912 ETA-25/0540

RD-Clamp

80 mm

Roof profiles

Domico GBS, RIB-ROOF 465 2 parts clamps for optimized from lock

ETA-25/0540

K15 Clamp

Roof profiles

Domitec Lysaght Klip-Lok 406 Safintra Saflok 410 Safintra Saflok 700

ETA-25/0540

K20-Clamp

Roof profiles

Fielders KingKlip Lysaght Kliplock Optima 980 WeatherClip 655 WeatherClip 700
