

System description

Guardrails at fall edges provide safe and collective protection against. They protect people on the roof and at the same time give them maximum freedom of movement, as there is no need to wear a PSgA inside a guardrail. This makes installation, maintenance and inspection work easier.

With GARDCO TRAPEZ you can secure your roofs in this way. GARDCO TRAPEZ is attached to the trapezoid using brackets. The roof pitch can be equalised along the eaves with inclined posts.

GARDCO TRAPEZ is tested in accordance with EN 13374 class A & B and can be installed on roofs with a pitch of up to 30°.

The advantages GARDCO TRAPEZ

- Protection against falling along the eaves and verge on metal roofs
- Post distances of up to 2.5 m
- Quick installation
- Made of aluminium. Not susceptible to corrosion

ROOFWALK – Safe routes on the roof

Supplement GARDCO TRAPEZ with ROOFWALK maintenance walkways. With ROOFWALK, you can create non-slip paths and access points to the places where inspection and maintenance work needs to be carried out.

We would be happy to advise you on this and look forward to hearing from you.
